

Steam cleaner - DE 4002

Deep cleaning without the need of chemicals

The DE 4002 steam cleaner provides hygienic cleanliness without the use of chemicals. Providing steam up to 150 °C this is the ideal cleaner where hygiene is essential.

Twin water tanks permit short heating up times and allow for continuous operation as the unit can be topped up at any time this guarantees not only continuous steam cleaning but also a fibre-deep, germ reducing cleaning process.

*Twin tanks
continuous operation*

Steam cleaner - DE 4002

Technical Specification

	DE 4002	DE 4002
Power supply (V)	240	110
Heater (kW)	2.2	2.2
Steam pressure (bar)	3.2	3.2
Steam temperature max. (°C)	145	145
Weight (kg)	7.5	7.5

**Twin tanks
continuous operation**

Short heating times:

The 2-tank system makes it possible to keep heating time to a minimum because only a part of the water supply has to be heated.

No waiting times, which allows continuous work as the unit can be topped up at any time during the cleaning operation, no cooling down or heating up times are required.

Features Vapohydro, the infinitely variable control of moisture content, from steam to hot water jet.
