

Cold water pressure washer - HD 10-25 S / S Plus

High performance, robust, innovative - built for ease of use.

Three-phase motor.

The most powerful high pressure washer in its class. The Kärcher HD 10-25 sets new standards with a waterflow rate of 1000 litres per hour and an operating pressure of 250 bar. A number of new innovations make it superior in terms of operator convenience, service life and cleaning performance.

The improved ergonomics of the new easy-press trigger gun ensure maximum operator comfort. The new servopress controller allows for convenient and precise adjustments of the water flow and operating pressure, all on the trigger gun.

Cold water pressure washer - HD 10-25 S / S Plus

Technical Specification

HD 10-25 S	
Motor type (Volt)	420
Pump pressure (mbar)	30-250
Water flow rate (l/h)	500-1000
Hose length (m)	10.0
Weight (kg)	62.0

Three-phase motor.

The HD 10-25 offers the best prerequisites for a long service life in professional applications.

The LED display of the motor's electronic protection system provides information on the motor's working condition and signals the actual cause in case of problems. Oil levels and operating pressure can also be monitored from the outside.

Other features that ensure an exceptionally long service life include:

- Detergent resistant brass cylinder head with stainless steel intake and delivery valves.
- Stainless steel pistons with ceramic sleeves.
- 4 Pole three-phase motor with a combination of air and water cooling, where the heat from the motor is used to provide warm water up to 30°C for cleaning.
