

Contemporary and versatile glueboard insect control

With a contemporary, discreet aesthetic and commercial efficacy, **Halo** is the most versatile glueboard flykiller available for use across a range of commercial applications. **Halo** is available as a slimline 30, 45 or 60W model which can be wall, desk or horizontal ceiling mounted, or a 2x30W double sided ceiling suspended unit. All **Halo** products feature a light reflecting swing down front guard, simple glueboard replacement and common high efficacy 15W UV tubes for reduced inventory requirements.

For increased efficacy **Halo** incorporates UV reflecting aluminium components such as the removable debris tray. The patented* variable side light output gates either allow 180° light output for increased efficacy or when closed, ensure UV light does not discolour decorative mounting surfaces.

Halo is designed for use with genuine GLUPAC™ pheromone impregnated glueboards, which incorporate UV stable dry glue for longer life and an increased catch.

Features

Patented* variable side light output

For maximum light out or mounting surface protection from the UV tubes

Commercial efficacy with a contemporary, discreet aesthetic

Flexible features for a wide range of applications

Quick, tool free access with a swing down front guard

Simple access to consumables for easy maintenance

High efficacy UV tubes, common across the Halo range

Proven to be more effective and longer lasting than standard UV tubes

Innovative glueboard technology

Designed for use with GLUPAC™ pheromone impregnated glueboards

Independent certification

Independently tested and certified to RoHS and all relevant European standards

Complete peace of mind

Three year guarantee (Excluding tubes)

Specification

Part No.	Model	Dimensions(mm)	Coverage	Tubes	Weight
ZF100	Halo 30	620x350x85	80m ²	2x15W	4.5Kg
ZF101	Halo 45	620x350x85	120m ²	3x15W	4.5Kg
ZF102	Halo 60	620x550x85	160m ²	4x15W	6.0Kg
ZF103	Halo 2x30	620x350x170	160m ²	4x15W	9.0Kg
