

Coin-operated dry vacuum cleaners

Simple self service machines

Kärcher has developed a contemporary programme of self service vacuums in various performance categories for cleaning vehicle interiors. The Kärcher self-service centre comes as a one-or-two piece model for operation with three-phase or single phase.

The built-in paper bin takes small items of litter such as packaging etc., to help keep the bay tidy.

Powerful suction and big area coverage: The ergonomically shaped suction tool is designed for efficiency, speed and ease of access to hard-to-reach places such as crevices in upholstered seats.

Column type design for particularly convenient handling: The suction hose can be extended to the exact length required without kinking or twisted.

Mono self service vacuums
5m suction hose with automatic suction nozzle

Duo self service vacuums
2x5m suction hoses with 2 automatic suction nozzles
