EDGE™

The most effective glueboard flykiller...

---

# INSECT-O-CUTOR®

## Edge

Developed to be the most effective glueboard flykiller on the market, Edge is designed around patented glueboard technology to catch significantly more flying insects than traditional glueboards.

As the glueboard is inserted into the flykiller it self-folds at the desired points, creating a unique form around high efficacy Synergetic™ UV tubes. This unique design forms edges, proven to be more attractive to flies, maximises useful UV light output, and creates a 30% larger glue area than traditional glueboards, creating a staggering 31.5% increase on a normal catch rate!

### The unique glueboard form provides three features shown to better catch flying insects:

1. The glueboard forms edges, proven to be more attractive to flies
2. 30% larger glue area than traditional 'flat' glueboards
3. The glue area is equidistant from the UV tube, maximising the useful glue area

## Features

### Unique, patented\* glueboard technology

Catches 31.5% more flies than traditional glueboards

### Swing down front guard

For simple and quick servicing, with full access to consumable parts

### High efficacy Synergetic™ UV tubes

Patented technology with dual wavelength output for an increased catch

### Removable service card and debris tray

Service friendly features for simple and quick maintenance

### Three way mounting for flexible installation

Simple wall, ceiling or desk mounting

### Independent certification

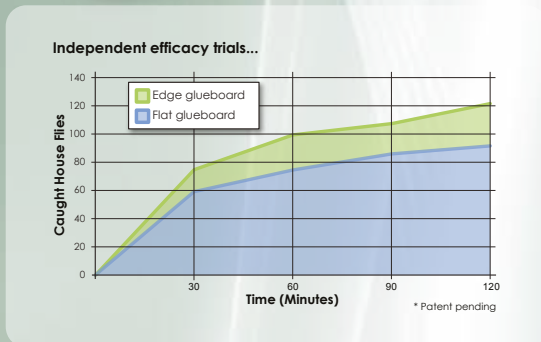

Independently tested and certified to RoHS and all relevant European Standards

### Complete peace of mind

Three year guarantee (excluding tubes and starters)

### Market leading design

Contemporary British design

| Product code | Description                    | Dimensions (mm) HxWxD | Coverage (m <sup>2</sup> ) | Tubes       | Weight (kg) |
|--------------|--------------------------------|-----------------------|----------------------------|-------------|-------------|
| ZF105        | Edge, 30 watt, Stainless steel | 380 x 570 x 110       | 80m <sup>2</sup>           | 2 x 15 watt | 5.3kg       |
