

## THE BROUGHTON HYDRA/CAVITY DRYER

Broughton's new HYDRA attachment means you can now turn the Powerblo into a Cavity Drier in minutes. Its universal fitting means that the Hydra can also be used with over 95% of the carpet driers in the UK market.

The Hydra will enable operators to dry or speed up the drying process in difficult to access areas. Above false ceilings, behind skirting boards, under floors, inside cupboards, all of these areas can now be tackled by directing one or more of the Hydra's 17 outlets into the smallest gap. Supplied with 15 metres of flexible hose that can be cut to the appropriate length for optimum efficiency and with 17 high density rubber air injectors, fitting and using the Hydra is simplicity itself.

With time taken to dry out properties an increasingly critical factor in the eyes of the insurance industry the Hydra enables operators to dry out hazardous electrical areas quicker thus reducing the need for expensive additional equipment like generators while electricity is restored.

- 17 connectors
- 15 metres non-kink flexible ducting
- Heavy duty polyethylene moulding (higher impact strength than steel)
- 2 Heavy Duty Spring Tensioners
- 5 Acid Resistant Air Injectors
- Lightweight and easy to store
- 7 Hose bungs
- 12 Plastic stoppers

As Broughton strive to manufacture to the highest standards we reserve the right to alter specification without prior notice.
