

James *JVP180*

James is not only a classic with personality plus, but he's also a very clever design based on genuinely thoughtful simplicity coupled with superb power and performance.

The on switch is my master control, it's bright red so you can't miss it, but once used, get ready to be impressed... we're talking professional standards now! The unique caddy

top is brilliant... somewhere for your cable, the tools and even a duster and some polish... right where you need them, when you need them - every time. Even the cable is securely plugged to the machine allowing easy replacement should it accidentally become damaged.

Big capacity, four wheel stability, giant filters coupled with two stage Microflo' dust bags give you the very best of all worlds, quick and efficient to use, simple to empty.

Accessories are to full professional size and specification... nothing skimped... nothing forgotten. Designed to do the job and do it well, wherever, whenever.

James, a simple design that started where most others stopped.

Motor	Power	Airflow	Suction	Capacity	Range	Weight	Dimensions
1100W	230V AC 50/60Hz	40 L/sec	2300mm	8L	26.8m	5.2Kg	340 x 340 x 340mm

Also available in 115V/120V specification. For additional accessories see page 11.
