

NuSpeed Spraytec *NRS450*

The majority of floor preparation and maintenance programmes require a machine with the optimum balance between weight and speed to achieve the desired results.

The Nuspeed NRS450 running at 450rpm and with an increased operating weight of 35Kg has been designed to provide a professional answer to applications where spray buffing is the obvious and cost effective solution to maintaining floors to a higher visual standard, which is often the need in high profile environments.

The Nuspeed series is now equipped as standard with performance enhancing "A.T.C", Automatic Torque Control. A unique system that monitors operation and boosts torque, as required, to provide consistent performance under varying load conditions.

When equipped with our spraykit this machine will provide a fully integrated system that is not only user friendly but equally floor friendly, both getting exactly what is required – ease of handling on the one hand and an excellent floor finish on the other.

The Spraytec system will provide, long and reliable service and results you will be proud of.

Optional SimpliSpray System

Cable Secure

Cable Release

Mains Plug

Heavy-Duty Gearbox

All NRS-450s are supplied as standard with our Spider Pad Drive. For brush applications select from our standard range see pages 15, 16 & 17.
