

NVQ-200/202

NVQ-200T

NVQ-370/372

NVQ-470

NVQ Range

A full commercial range, providing a selection of models and specifications all with the NuCable plugged cable system that will meet and, in many cases, exceed professional standards.

NVQ-200/202

Probably the most professional small machine the NVQ-200 is built to an exacting standard. The steel power head incorporates our patented Microtec noise reduction system, with a 2-speed Hi/Lo option (NVQ-202). Plugged cables, giant filters, 4-wheel stability and stainless steel

accessories add to the exceptional standard.

Kit A1

NVQ-200T

The NVQ-200 is in itself an exceptional machine but when you add our unique 24 volt safety specification Turbo Electric Power Brush system you really do have the very best of all worlds.

This combination provides fast, effective and quiet carpet care which will be fully appreciated in noise sensitive environments.

Kit T20

NVQ-370/372

The larger brother of the 200, the 370 boasts a 50% increase in capacity whilst maintaining all the usability features of the smaller model. A 2-speed option (372) is

available with the added advantage of even lower noise levels that maybe required at certain times of the day or night.

Kit A1

NVQ-470

In many of the larger commercial establishments bigger is better for all the obvious reasons and, in this respect, the 470 provides a 100% increase in capacity over the 370 model.

All the unique NVQ features are maintained including the Microtec noise reduction system and plugged cable features but to this has been added our unique handle and movement system taking into account the extended use in bigger areas.

Kit A1

NVQ-380/382

A classic commercial specification that combines an all steel low noise level Microtec power head, a 2-speed Hi/Lo option (382) and our unique, rugged Structofoam container, giant filter system and full

accessory kit. The smallest model in our Structofoam series.

Kit A1

NVQ-380/382

NVQ-570/NVDQ-572

NVQ-900/NVDQ-902

NVQ-570 NVDQ-572

Rugged Structofoam construction for both power head and container, a choice of single motored (570) or twin motored (572) models and full 38 mm (1.5") accessory kit including stainless steel tubes and fully matching 400 mm (16") Structofoam floor nozzle.

Kit BB2

NVQ-900 NVDQ-902

Plenty of power, plenty of capacity and plenty of Structofoam in the overall construction. The 900 series is available in either one motored (900) or two motored (902) specifications providing exceptional results and totally reliable service life. A true professional in every respect.

Kit BB2
