

Twintec Battery *TTB4552S* non-traction

The TTB4552S mid range twin-brush machine takes one half of its design from the 3450/4500 series with its stainless steel chassis, polyurethane wheels, floating nozzle, built-in charging system and ABP system (the unique patented Adjustable Brush Pressure system).

To this we have added the twin-motored, twin-brush power head which virtually doubles the working weight that is available on the floor surface. It is a little like taking a car with a 4 cylinder engine and swapping it for a V8! The power is exactly where you need it and ideally suited to the more arduous applications. The full 100A/hr battery system ensures a good operating range, and with a full 40-litre capacity and 55cm cleaning path provides excellent performance.

The TTB4552S really does pack more innovation, performance and usability into one machine than most.
