

HZQ 570-s Specialist Insulated Hazardous Vacuum

Description

Certain Hazardous environments dictate specific equipment, one such application is cleaning around transformer banks or other electrical installations. Numatic has overcome this problem by producing a "Structofoam" polypropylene Vacuum giving you the insulated properties required for such applications.

Power is provided by a "Twinflo" vacuum motor giving superior performance every time. Three layer filtration ensures a filtration level of 99.997% thanks to the fitted "HEPA" module and if that wasn't enough, screw caps are supplied for use during transportation, meaning that once in the vacuum "it stays in the vacuum". Mobility is made easier using multi directional castors.

A full plastic accessory kit is also provided as standard giving you the tools to complete the job straight from the box.

Specifications

Power; 1200 watts (max). Airflow; 45 litres/second. Suction; 2600mm.

Capacity 23 litres. Cleaning range; 26.8 metres. Weight; 15Kg.

Size: 645mm x 415mm x 415mm. Decibel level; 71.7 DBA
