# Workshop Utility Vacuum

## NV750-s

The NV 750 workshop utility vacuum incorporates many features making it ideal for most workshop applications.

The compact design of the vacuum makes it suitable for storing under the work bench.

The vacuum incorporates a “Twinflo” vacuum motor providing more than enough power for most cleaning tasks. Each vacuum comes complete with a “Permatex” filter giving a filtration level down to “0.5 microns” which is further enhanced by the included pack of “HEPAFLO” disposable bags. Each vacuum is fitted with a 32mm - 51mm cyclonic entry suitable for connecting a range of specialist accessories. A 2.5 mtr 51mm vacuum hose with rubber cuff up to 58mm and crevice tool are also supplied making the NV 750 workshop utility vacuum ready for action straight from the box.

**Aimed at:**

Workshop applications, Hobbyists, General use, Light industry.
