# Workshop Utility Vacuum

## NVD750-s

When it comes to workshop applications coupled with unrivalled performance, the NVD 750 workshop utility vacuum is in a league of its own. Many operational features are included within the package which will enable the user to link the vacuum to wood turning machinery or a hand operated power tool as required.

The head assembly incorporates two “Twinflo” vacuum motors providing ample power for all but the most demanding of applications. The drum assembly incorporates a 100mm cyclonic inlet connector with a 51mm reducer suitable for connecting hose sizes from 32mm up to 100mm, making this the perfect solution for many workshop utility applications. Also included is an accessory kit comprising of a 4 mtr 100mm vacuum hose and 32mm 2.9 mtr vacuum hose, which can be linked to a hand operated power tool using the supplied step down adaptor. Action packed and ready to use.

A comment we’re happy to share!

**Aimed at**  
Workshop applications, Hobbyists, General use, Heavy industrial applications

**Power Rating**  
Light - Heavy use

**Capabilities**  
Use in conjunction with heavy workshop equipment, Sanding and grinding, Domestic use, Filtration down to 0.5 micron retaining 99.7%

**Limitations**  
Dry pick-up only, Not suitable for Hazardous Dust

**Further Upgrades**  
HEPA module, Mobile or clip on chassis
