

Numatic International Ltd Specialised HZD750 Hazardous Utility Vacuum

Product code; 833035 (230v) or 833037 (110v)

SSP; £867.72 + VAT

Many dusts are known carcinogenic substances, something that needs to be cleaned up with care. Numatic has recognised the many problems created when cleaning up in this type of environment, something now catered for using our range of Hazardous Utility Vacuums. Powered by twin 1200 watt 'Twinflo' motors, the HZD750 comes with more than enough power to tackle all but the most demanding of tasks. A Lo-Flo indicator and 'Nu-Cable' removable plug system are incorporated in the design, not to mention the fitted exhaust port. Supplied with a HEPA filtration module certified to 'H' type retaining 99.997% and primary 'Permatex' filter and 35 litre HEPA-FLO dust collection bag, meaning that once it is sucked into the vacuum, it stays in the vacuum! The vacuum set up incorporates a fully mobile chassis and accessory kit, making it ready for use no matter what the task, a perfect recipe for complete cleaning success.

Supplied
with 38mm
Accessory Kit

The HZD750 carries the latest in technical compliance approvals and is part of a new improved product range produced by Numatic Specialised aimed at Hazardous Utility Applications.
