

## Numatic International Ltd NQS350B Dry Pick up Utility Vacuum (machine only)

Product code; 799276 (230v)

---

Designed for use as a Workshop type vacuum the Specialised NQS350B is aimed at applications where particulates that may be abrasive are being collected. The vacuum is constructed using metal components, further enhanced by the fitted stainless steel deflector plate and blower attachment. Supplied without a chassis, the vacuum is ideally suited for siting under a workbench in a static location, however can be moved if required utilising the carry handle mounted on the powerhead.

With an overall capacity of 10 litres, the vacuum is able to accommodate a variety of cleaning tasks where smaller amounts of particulate debris are being collected.

This particular vacuum is supplied as a machine only giving the freedom to choose the type of kit required, dependant upon application.

The NQS350B carries the latest in technical compliance approvals, aimed at Workshop Utility Applications and forms part of a new range of improved products introduced by Numatic Specialised.

If you are looking to place an order contact the Specialised Office on 01460 269401 or E-mail: [ukdistribution@numatic.co.uk](mailto:ukdistribution@numatic.co.uk)
