

## Numatic International Ltd Specialised WVD570c Wet Pick up Utility Vacuum

Product code; 903762 (230V)

SSP; £573.31+ VAT

Manufactured in Structofoam the WVD570C is the new entry level product for industrial wet pick up utility applications. Supplied with 'Duplex' TwinFlo bypass motors, the vacuum has more than enough power for the most demanding of tasks, further enhanced by the inclusion of a 51mm cyclonic side entry. With a wet capacity of 15 litres and a dry capacity of 23 litres, the vacuum remains compact yet big enough to tackle most tasks.

Utilising complete Structofoam construction, an exceptionally tough compound that does not scratch, dent or deteriorate, is lightweight and resists all standard cleaning chemicals.

Each vacuum is supplied with a separate dry filter and a full BS8 accessory kit as standard making it suitable for wet or dry applications as required.

The WVD 570c carries the latest in technical compliance approvals and is part of a new improved product range produced by Numatic Specialised aimed at Wet Pick up Utility Applications. The vacuum can also be used for dry pick up applications as required. If you are looking to place an order contact the Specialised Office on 01460 269401 or E-mail: [ukdistribution@numatic.co.uk](mailto:ukdistribution@numatic.co.uk)
