

# CombiVac CV570, CVD570, CV900, CVD900

The unique filter system in the CombiVac enables the user to switch from dry to wet pick-up without the need to change filters or kits.

The tough Structofoam construction doesn't dent, scratch or deteriorate but is light in weight and resists all standard cleaning chemicals.

CV570 (Single motor)  
CVD570 (Dual motor)

CV900 (Single motor)  
CVD900 (Dual motor)

Giant wet and dry primary basket filter

Clean, dry floors again and again

- **Wet and Dry Pick-up**  
No need to change kit or filter.
- **Washable Filter System**  
High efficiency dual washable filter system.
- **High Quality Accessories**  
BS8 kit with stainless steel tube set.
- **Structofoam Construction**  
Heavy duty Structofoam used in both head and body construction, built to endure years of hard industrial use.
- **Convenient Emptying**  
Emptying couldn't be easier using the unique tipping handle (900 model).

\*Ready to use (Machine + Kit)

# WetVac WV370, WV380

The WV370 and WV380 are by design, wet or dry vacuum cleaners that perform totally without compromise in either mode.

We know full well that when you want to use as a dry machine, performance must be as good as a dry-only machine, big filters and the option of giant HepaFlo disposable dust bags ensure a high standard of operation.

Similarly, when required for wet work, a quick switch of the dry filter for the wet float valve and a change of floor nozzle will give you equally professional performance and a clean, dry floor at the end of it all.

WV370

WV380

- Wet or Dry**  
 Professional results in either mode, accessories provided for both wet and dry use.
- Compact**  
 Easy to store compact design, always close to hand when needed.
- Tough Professional Construction**  
 For especially tough conditions the WV380 Structofoam drum design is ready for anything professional use will throw at it.

Safety net filter and float assembly

High efficiency ProFlo wet floor tool

# WetVac WV470

The WV470 provides a larger alternative to the 370/380 series, with twice the capacity but to the same high performance standard be it wet or dry.

The folding handle design allows easy movement when in use, whilst being compact to store.

Large rear wheels provide stability and make light work of obstacles during transit.

The accessory kit provides tools for both wet and dry operation with lightweight aluminium tube set as standard.

WV470

Fold down transit handle WV470

Large rear wheels

- Wet or Dry**  
 Professional results in either mode. Accessories provided for both wet and dry use.
- Compact & Capable**  
 Compact with a small foot-print the 470 provides an impressive 20L Wet / 27L Dry capacity.
- Folding Handle**  
 The transit handle makes life easy when you need it and folds away when you don't... simple!
- On the Move**  
 Not everywhere will be flat and smooth, large rear wheels and directional castors make transporting the 470 easy, even when full.
- Easy Emptying**  
 Fitted with easy empty handle providing simple and clean emptying (WV470).

# WetVac *WV570, WVD570, WV900, WVD900*

The mid range EcoWet 570 and 900 designs are classics in every respect both in design and manufacture.

EcoWets have now been raised to our full 38mm (1½") standard, providing performance enhancements allowing single motor models to perform to improved standards. Both models use complete Structofoam construction, an exceptionally tough compound that doesn't dent, scratch or deteriorate and yet it is lightweight and resists all standard cleaning chemicals.

# WetVac WV1800DH, WVD1800DH, WVD1800AP

The "1800" big capacity models are simply unsurpassed within their field.

The Structofoam construction is unequalled, a selection of one or two motor options, 38mm (1½") accessories in stainless steel. Simply, as good as you can get.

The power head is fully Structofoam by design, incorporating TwinFlo 2-stage bypass motors and the Nucable plugged replaceable cable facility is an added feature.

WVD1800AP  
(Dual motor)

Auto submersible pump (AP model)

- **Structofoam Construction**  
Heavy duty Structofoam used in both head and body construction.
- **Nucable System**  
Power cables can be changed without the need for an electrical engineer.
- **Auto Emptying**  
Auto pump models provide for continuous operation pumping out literally as much water as you can take in.
- **Professional and Powerful**  
Longlife professional TwinFlo bypass motor.

# WetVac WVD2000DH, WVD2000AP

The 2000 wet series is the epitome of heavy duty, Duplex professional machines that have been giving users their best performance for more than 20 years.

Like the full range of wets, the 2000 series has been enhanced by increased efficiency in terms of wet pick-up, working better and quicker than ever before. You will find the 2000's trundling over building sites and used by fire crews in fire and flood damage applications. In fact, wherever there is lots of water to be collected, or for continuous pumping operations, there you will find the 2000 auto pump models, and you literally will not find better.

- **On the Move**  
A heavy duty steel external chassis makes light work of transportation even when at the full capacity of 70 litres.
- **Auto Emptying**  
Auto pump models provide for continuous operation pumping out literally as much water as you can take in.
- **Professional and Powerful**  
Longlife professional TwinFlo bypass motors.
- **Structof foam**  
Heavy duty Structof foam head construction, built for years of hard use.
- **Industrial Accessories**  
Full 38mm (1½") with long hoses and stainless steel tube set.

# WetVac Battery *WVB750, WVDB750*

## 24V Freedom for 101 reasons... and no two of these are the same!

The whole cordless concept of this battery powered machine, is to provide convenience where accessibility to a normal mains supply is simply not possible, or not acceptable for reasons of safety or logistics.

The machines' specifications from top to bottom are without doubt to the highest of standards, with a choice of Simplex 1 motor or Duplex 2 motor models.

The stainless steel construction incorporates twin 56 amp / hour gel batteries and their own dedicated charger system. The container is totally resistant to all forms of deterioration, ensuring a longlife design with outstanding appearance and performance.

A formidable cordless package that will go anywhere, any time.

WVB750 (Simplex)  
WVDB750 (Duplex)

Safety net filter and float assembly

Large transit wheels

On-board charger, easily accessible

Simple on / off switch

WVB750 (Simplex)  
WVDB750 (Duplex)

- Choice of Motor**  
 Simplex 1 motor power head (WVB750)  
 Duplex 2 motor power head (WVDB750)
- 31L Dry / 22L Wet Capacity**  
 Professional results in either mode, professional accessories provided for both wet and dry use.
- High Performance Gel Batteries**  
 2.5 hours of runtime with the Simplex model, and for extra performance the Duplex version with 1.25 hours of running time between charges.
- On-board Charger**  
 Twin 56 amp / hour gel batteries and their own dedicated charger system.
- Large Transit Wheels**  
 Not everywhere will be flat and smooth, large rear wheels and directional castors make transporting the 750 easy, even when full.
- Detachable Container**  
 The stainless steel container is totally resistant to all forms of deterioration, ensuring a longlife design with outstanding appearance and performance.
- Professional Accessory Set**  
 A tool for every job, full accessory kit BS8 with stainless steel tube set.
