

WV 570 Sc SSE Workshop Utility Vacuum

Supplied Kit

Vacuum Hose

Discharge Hose

Wand Sections

830mm long reach
ABS Crevice Tool

240mm Crevice Tool

Included ABS Kit Specification

1 x Vacuum Hose
1 x Dump Hose
2 x Wand Sections
1 x 830mm Long Reach
ABS Gulper Tool
1 x 240mm ABS
Crevice Tool

Capabilities

Safe removal of swarf
and coolants.

Category

Light industrial use.
Maintenance
applications.

Getting Technical

Voltage; 110
Plug Type; 16Amp
Power; 1200 Watts
Cable Length; 10mtr

Suction; 2400 mm
Airflow; 40 litres/sec
Hose Diameter; 32mm
Capacity; 15 litres

Weight; 15.5Kg
Size; 645x415x415mm
Decibel Level; 78.6DBA

Limitations

Cannot be used to
pick up Hazardous or
Volatile substances
Option 2 kit required
for dry pick up
applications.

Description

The "Sc" range of vacuums are recognised today as the most suitable vacuum for use in an engineering workshop, with over 18 years of satisfaction the WV 570 Sc sets the standard with professional users. The vacuum is constructed using a material called "Structof foam" which embodies an unrivalled strength often found in heavier more unsuitable materials giving us a light weight product, something all too important in today's working environment.

The ergonomically designed "Structof foam" power head is fitted with a By-pass motor as standard, delivering smooth and efficient output with increased airflow and suction using "Twinflo" motor technology. The vacuum is fitted with secondary filtration as standard to help prevent the problems caused by oil mist, this works alongside the zinc plated metal float assembly providing the perfect solution for the engineering environment. A bespoke ABS accessory kit is also included and is ideal for cleaning those hard to reach areas with ease.
