

NTD 750m

NV 750s NVD 750s

NTD 750c

With Numatic Specialised the choice is clear with a range of bespoke products aimed at Dry Pick up Workshop Utility Applications. Each model is supplied with a full accessory kit and is suitable for a multitude of cleaning applications.

Numatic NV750s Workshop Utility Vacuum

Designed exclusively for use in workshop applications, the NV750s is the ideal cleaning companion for the hobbyist or light industrial applications. The vacuum is powered by a single 1200 watt motor giving more than enough power to tackle most cleaning tasks. Being manufactured in metal the vacuum gives a retro appearance, further enhanced by the fitted fully mobile chassis. Utilising a universal 32-51mm cyclonic entry, the vacuum can be used with a multitude of accessories available separately, however is supplied with a 2.5mtr 51mm hose and gulper tool as standard. As with all Specialised Products the set up also includes a packet of HEPA-FLO disposable dust bags making each vacuum suitable for use straight from the box.

The NV 750s carries the latest in technical compliance approvals, aimed at Workshop Utility Applications and forms part of a new range of improved products introduced by Numatic Specialised.

Features Include

10mtr Plugged Cable System

Powerful 1200 Watt Thru-Flo Motor

All Metal Construction

Fully Mobile Chassis

51mm Cyclonic Entry

35 litre Waste Capacity

Permatex Filter Set

HEPA-FLO Dust Bags (1 x packet included)

Accessory Package

Two Year Vacuum Warranty

Selling Points; Large Capacity, Small Footprint, Universal 51mm Cyclonic Entry

With Numatic Specialised you get more than just a vacuum cleaner. Our products are custom manufactured in our own bespoke workshops giving a unique build quality, while encompassing the traditional standard Numatic design. The products you buy from us are generally available ex stock and ready for immediate dispatch straight from our warehouse holding area.

Numatic NVD 750s Workshop Utility Vacuum

The bigger brother to our ever popular NV750s, the NVD750s is by far the most powerful medium sized utility vacuum available today. The vacuum incorporates two 1200w Twin-Flo motors delivering outstanding performance when in use and can operate using hose sizes ranging from 32mm-100mm, utilising the on-board 100mm cyclonic inlet with reducer end cap.

The vacuum design is manufactured in metal with a 35litre capacity, built to last and even comes with a fully mobile chassis, making it fully manoeuvrable when in use. With a full accessory kit supplied the vacuum is raring to go, no matter what the job at hand.

The NVD 750s carries the latest in technical compliance approvals, aimed at Workshop Utility Applications and forms part of a new range of improved products introduced by Numatic Specialised.

Numatic NTD 750m Microfilter Vacuum

When looking for a higher level of filtration, the NTD 750m comes complete with a HEPA filtration module giving increased performance in dusty environments. When used with HEPA-FLO dust bags and the supplied primary filter, expected filtration levels increase to 99.998% at 0.5 micron. Utilising a twin motored power head fitted with by-pass motors the vacuum provides more than enough power for most applications. The metal design of the vacuum gives an industrial retro appearance giving an overall capacity of 35 litres, utilising our NVM 4BH dust collection bags, promoting a dust free atmosphere when removing/refitting the bags. Mobility is also an important factor, something taken care of, incorporating a fully mobile chassis as standard and a full kit BA5 accessory kit to complete the package.

The NTD 750m carries the latest in technical compliance approvals, aimed at Workshop Utility Applications and forms part of a new range of improved products introduced by Numatic Specialised.

Numatic NTD 750c Cyclonic Vacuum

When looking for something a little different, the Numatic NTD 750 Cyclonic Vacuum is sure to raise the standard with bespoke cleaning applications. Each vacuum is fitted with twin bypass motors mounted in a Structofoam head assembly providing ample power for all but the most demanding of tasks.

Fitted with a 51mm cyclonic interceptor, the vacuum can be used with a multitude of kit options, supplied with a kit BA5 as standard and includes a fully mobile chassis, giving a higher level of freedom when in use. With a generous 35 litre capacity, the vacuum is ideal for use in utility operations and especially suited for workshop applications.

The vacuums can be used with either NVM 5BH dust bags (when using the cyclonic) or NVM 4BH dust bags if wishing to use the main drum assembly input.

The NTD 750c carries the latest in technical compliance approvals, aimed at Workshop Utility Applications and forms part of a new range of improved products introduced by Numatic Specialised.
