

NuSpeed NR1500 S, M & H

NuSpeed is a new generation of floor maintenance machines which is only made possible by a new drive system, introducing a dramatic 50% increase in power output.

The unique NuSpeed design concept means that for a machine of such compact proportions, an increase to 40kg in the operating weight can be achieved within the standard specification, with an optional additional 10kg if required... it has the power and weight that do the work and produce the results.

In addition to the power and performance, many extra operating features have been added, making this machine perhaps one of the most user friendly, hard working professionals, in the Floorcare business.

The NuSpeed series is now equipped, as standard, with performance enhancing ATC, Automatic Torque Control. A unique system that monitors operation and boosts torque as required to provide consistent performance under varying load conditions.

Available in 3 speeds, standard 150rpm Heavy Duty, medium 230rpm Universal and high 300rpm Spray Clean.

In today's Floorcare market the 230rpm universal is really two machines in one, with excellent and efficient performance be it scrubbing, polishing or spray cleaning.
